DEVSYNC — FINAL ACTIVITY DIAGRAMS

Balanced layout with corrected spacing, alignment, and connector routing

Legend:

- blue rounded rectangle = action
- yellow diamond = decision
- green = start
- red = end
- orange = alternate/exception flow

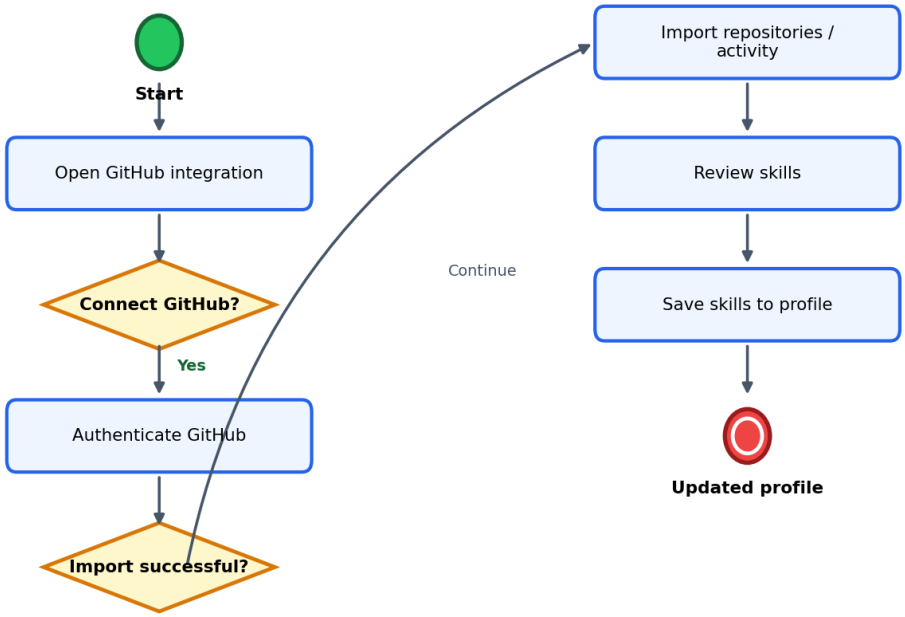

UC-01 — Login & Profile Setup

UC-01-GH — GitHub Integration & Skill Review

UC-01-GH | GitHub Integration & Skill Review

DEVSYNC

ALTERNATE / EXCEPTION FLOW

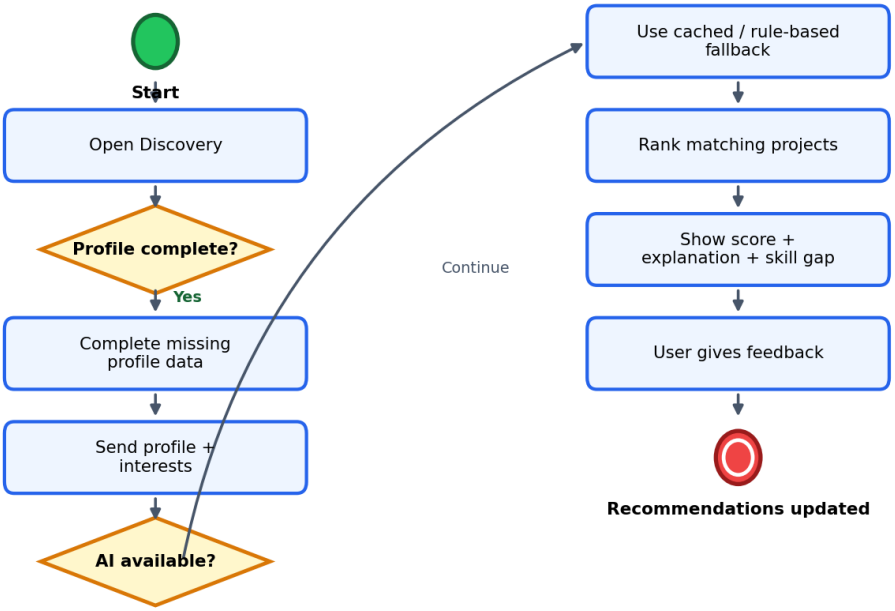

- No → skip GitHub / use manual data
- Failure → continue without import

Consistent grid • equal spacing • clean connectors • UML-style notation

UC-02 — AI Recommendations & Feedback

UC-02 | AI Recommendations & Feedback

DEVSYNC

ALTERNATE / EXCEPTION FLOW

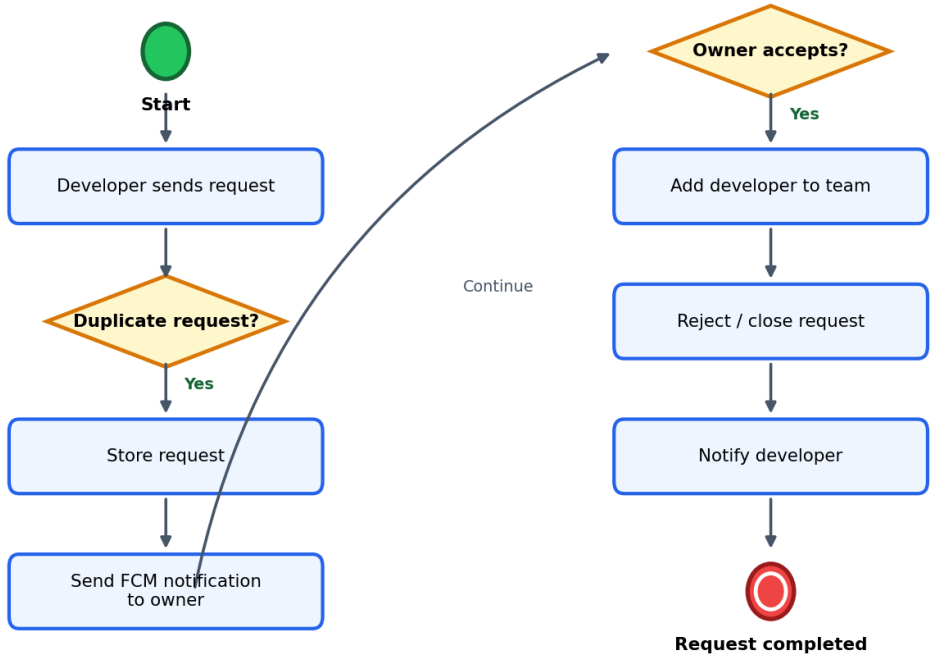

- No → completion prompt
- No → fallback matching

Consistent grid • equal spacing • clean connectors • UML-style notation

UC-03 — Collaboration Request & Response

UC-03 | Collaboration Request & Response

DEVSYNC

ALTERNATE / EXCEPTION FLOW

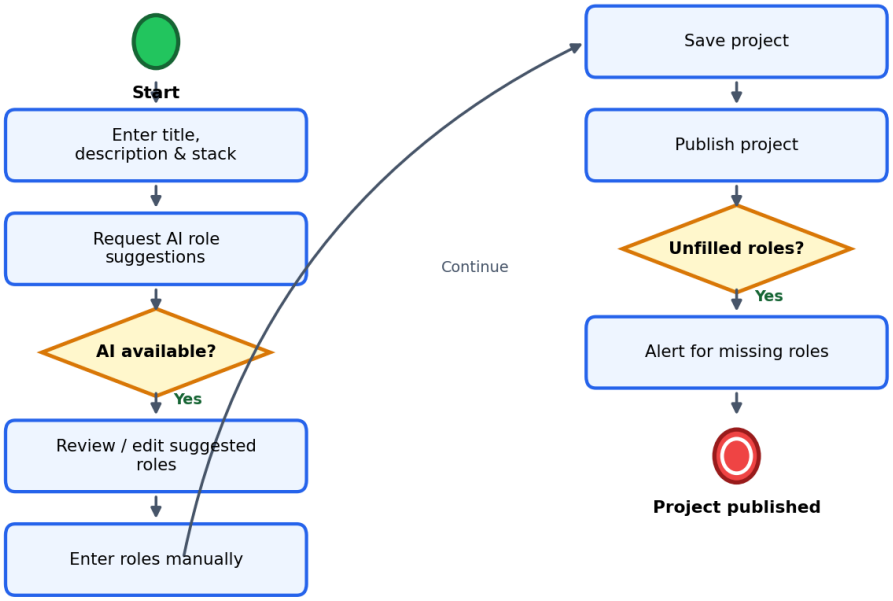

- Yes → block duplicate
- No → reject / close

Consistent grid • equal spacing • clean connectors • UML-style notation

UC-04 — Create Project & Generate Roles

UC-04 | Create Project & Generate Roles

DEVSYNC

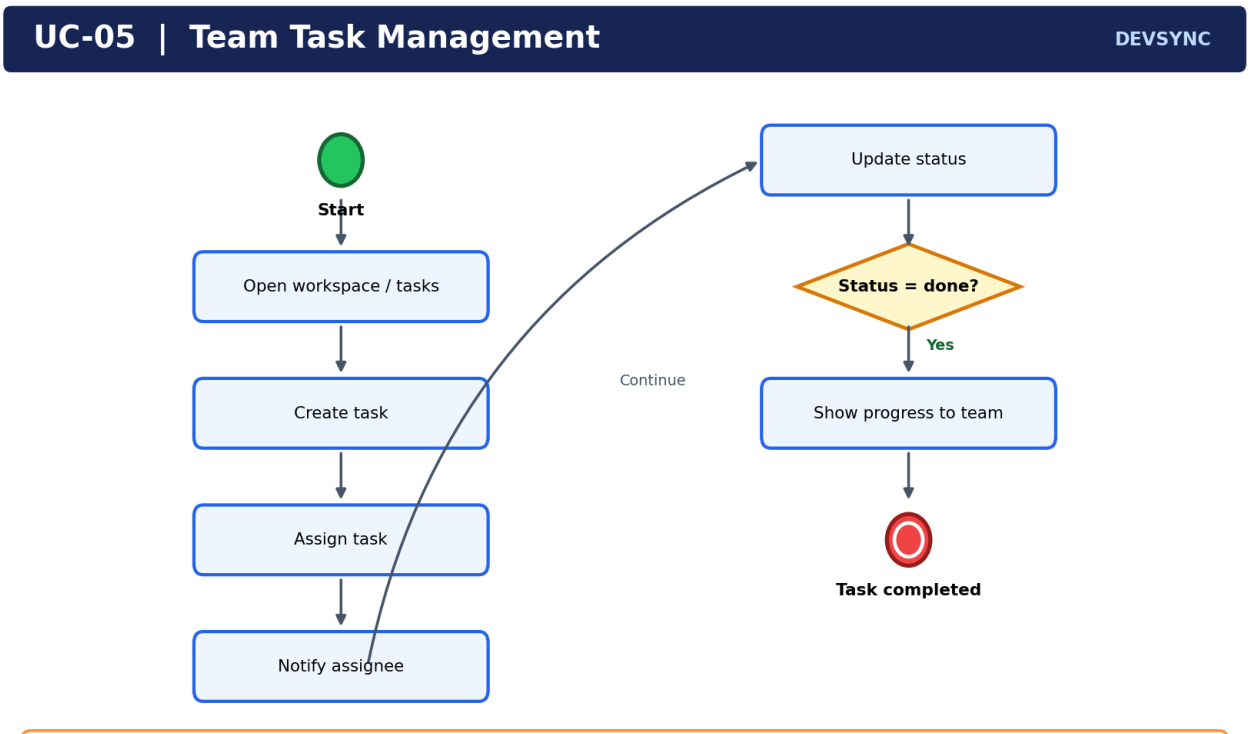

ALTERNATE / EXCEPTION FLOW

- No → manual roles
- No → project is fully staffed

Consistent grid • equal spacing • clean connectors • UML-style notation

UC-05 — Team Task Management

ALTERNATE / EXCEPTION FLOW

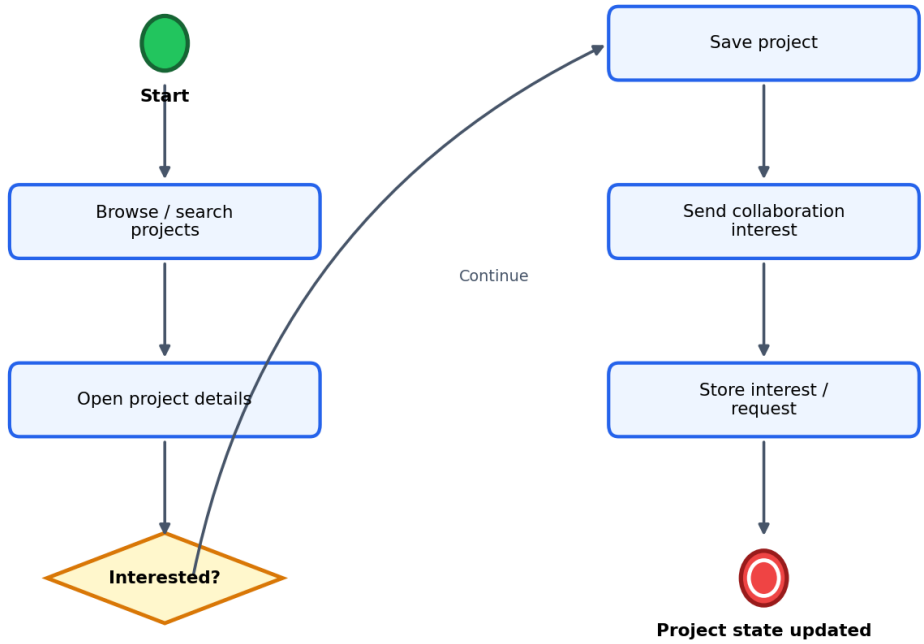

- No → keep task active

Consistent grid • equal spacing • clean connectors • UML-style notation

REQ — Project Discovery & Interest

REQ | Project Discovery & Interest

DEVSYNC

ALTERNATE / EXCEPTION FLOW

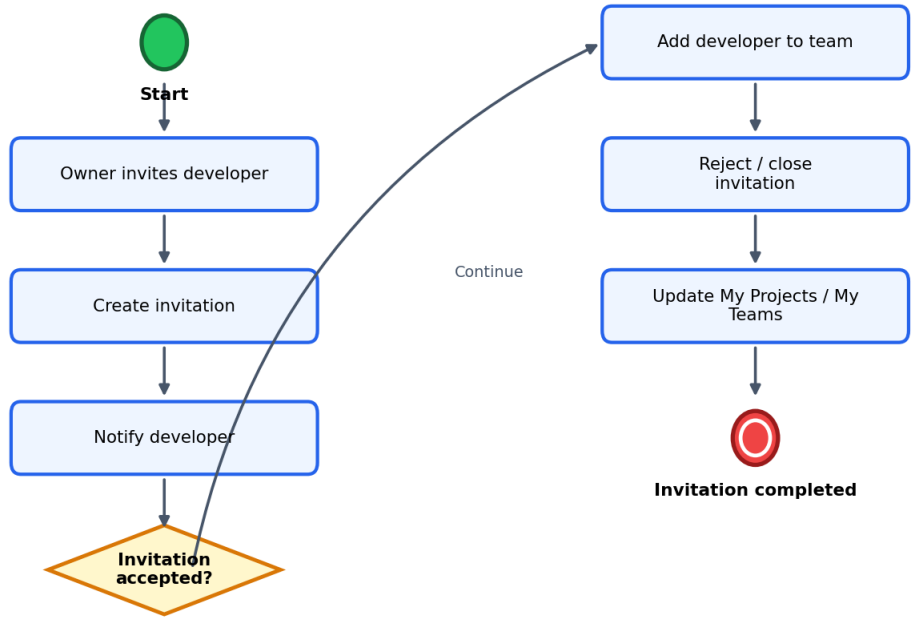

- No → return to discovery

Consistent grid • equal spacing • clean connectors • UML-style notation

INV — Invitation Flow

INV | Invitation Flow

DEVSYNC

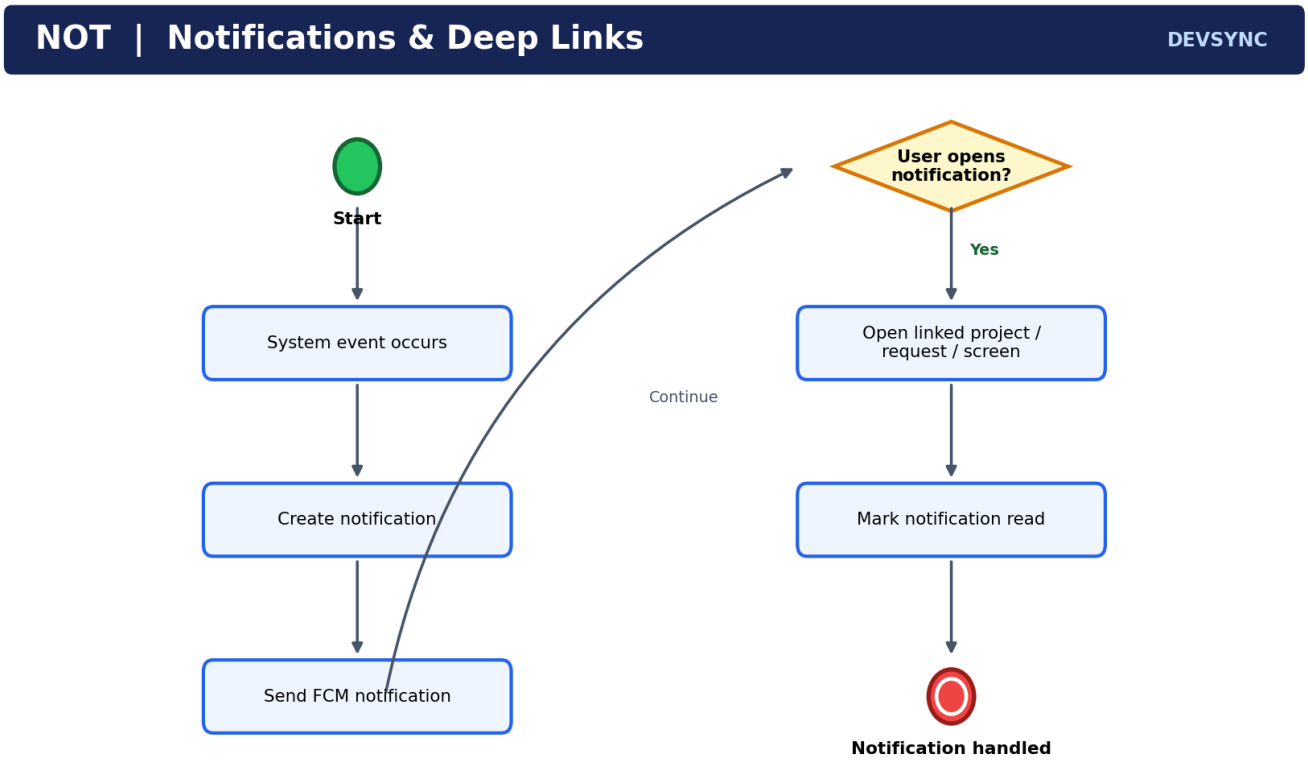

ALTERNATE / EXCEPTION FLOW

- No → close invitation

Consistent grid • equal spacing • clean connectors • UML-style notation

NOT — Notifications & Deep Links

ALTERNATE / EXCEPTION FLOW

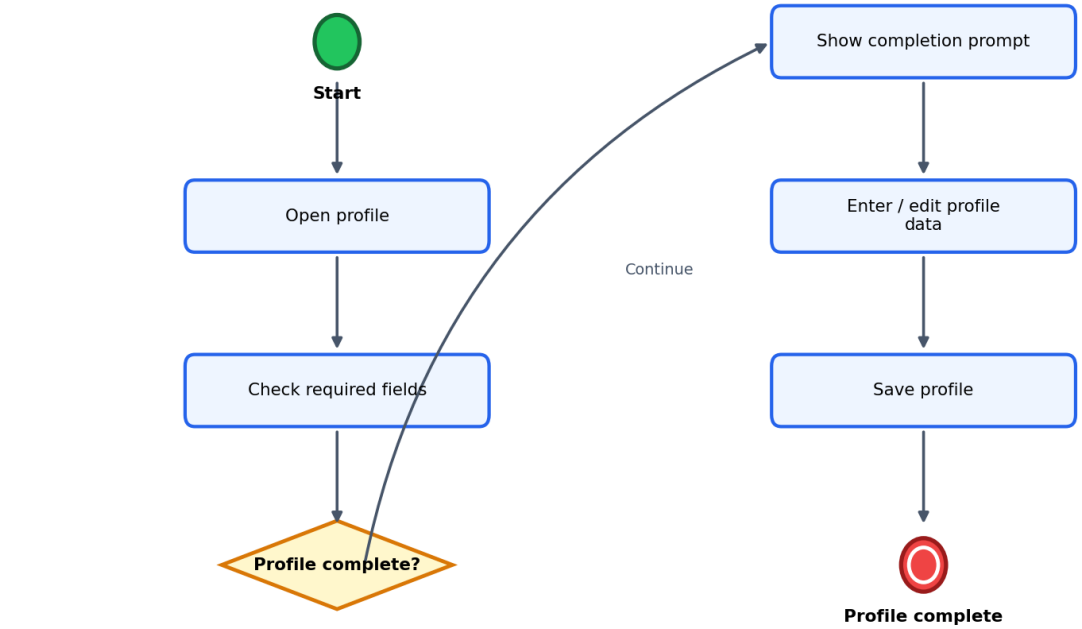

- No → keep notification available

Consistent grid • equal spacing • clean connectors • UML-style notation

PROF — Profile Completion

PROF | Profile Completion

DEVSYNC

ALTERNATE / EXCEPTION FLOW

- Yes → continue to app

Consistent grid • equal spacing • clean connectors • UML-style notation
